SCAN FOR PORTFOLIO

PROFESSIONAL SUMMARY

Web and app developer and Cum Laude BS Information Technology graduate who is passionate about turning ideas into interactive software. Builds complete web systems and Android apps end to end with Laravel, PHP, MySQL and React Native, using AI coding tools like Claude Code: plans each system and its data, directs the AI, then reviews, tests and fixes every change. Four portfolio projects with real user roles and dashboards, including TeachWise, a multi-school Android and web app backed by 72 API tests. Brings a networking and cybersecurity background that keeps security in mind. Seeking a junior or trainee developer role.

TECHNICAL SKILLS

Front-end & mobile	HTML5, CSS3, JavaScript, TypeScript, React Native, Expo, jQuery, AJAX, Bootstrap, Tailwind CSS, Chart.js, GSAP, responsive design
Back-end & databases	PHP, Laravel, Node.js, npm, MySQL, phpMyAdmin, REST APIs, role-based authentication
AI-driven development	Claude Code (AI coding agent), Claude · planning, reviewing and testing AI-written code
Tools & workflow	Git, GitHub, XAMPP, VS Code, Postman, automated testing · Design: Figma, Canva
Networking	TCP/IP, IP addressing and subnetting, DHCP, DNS, VLANs, basic routing and switching, Cisco Packet Tracer
Security tools	Wireshark, Nmap, Splunk (SIEM), Kali Linux, Burp Suite, Metasploit, Snort, VirusTotal, log analysis, incident documentation
Systems & office	Linux, Windows, Active Directory, Microsoft Office, Google Workspace · Other language: C++
Soft skills	Clear communication, on-site coordination, problem solving, working independently on deadlines

PROJECTS

TeachWise — Teacher-Evaluation App (Android + web)

Laravel · React Native · Expo · MySQL · TypeScript

Personal project · built with Claude Code · preparing for Google Play

- Anonymous teacher-evaluation app for schools: students rate each class step by step in about three minutes, with drafts that survive going offline.
- Five user roles; teachers see ratings, trends and anonymous comments with a printable report; admins manage departments, classes, evaluation periods and questions in English and Filipino.
- Multi-school design where every record carries a school ID and is filtered on every request; REST API with 72 tests; one codebase for Android and the web.

Servease — Home-Services Marketplace

PHP · MySQL · JavaScript · GitHub

- Marketplace connecting customers with ID-verified local service pros, with three user roles: customer, pro and admin.
- Customers book pros, post jobs, chat and leave reviews; pros send quotes and track bookings and earnings.
- Admin dashboard to verify pros and monitor users, bookings, payments and ratings, with a responsive, app-like interface.

BookTrack — Library Management System PHP · MySQL · JavaScript · GitHub

- Built solo in one month as my capstone (LibraSys), then rebuilt and expanded it into BookTrack.
- Members browse the catalogue, borrow books and track due dates; librarians manage books, members and circulation.
- Designed the relational MySQL database and a librarian overview with loan statistics, overdue follow-ups and monthly charts.

Padala — Encrypted Project-Delivery App Node.js · JavaScript · in development

- Installable app that delivers project folders to a team, encrypted on the device (AES-256) before sending; updates send only the changed files.
- One-time team invite links that expire after 7 days, a built-in onboarding assistant, 44 automated tests and zero dependencies.

EXPERIENCE

On-the-Job Trainee 2026

Department of Information and Communications Technology (DICT)

- Helped distribute and deploy free Wi-Fi SIM cards with 25 GB of monthly data to schools; explained the program to students and staff and coordinated on site.
- Assisted with basic networking tasks during field deployments and supported senior developers with their website work.
- Completed gamified, self-paced coding training on Walnut Education and trained in Capture the Flag (CTF) challenges.

EDUCATION

BS Information Technology, Major in Networking

Mindanao State University – Sulu · 2022 – July 2026

- **Cum Laude**
- Outstanding Student Awardee 2026
- AHME Scholar 2022–2026

CERTIFICATION & TRAINING

- **Google Cybersecurity Professional Certificate** (Coursera) · Jul 2025
- **SIEM Engineer Career Path** (LetsDefend) · Jun 2025
- **Cyber Threat Management** (Cisco Networking Academy) · Jun 2025
- Also completed: Cybersecurity Analyst Job Simulation, Information Security Specialist
- **SOC analyst labs:** TryHackMe (SOC Level 1), LetsDefend, SecurityBlue.team; Splunk log analysis, phishing and brute-force investigations
- **Capture the King CTF:** team cybersecurity competition
