EDUCATION

Mindanao State University – Sulu Jolo, Sulu
Bachelor of Science in Information Technology, Major in Networking, **Cum Laude** Jul 2026

- Honors: Outstanding Student Awardee (2026); AHME Scholar (2022–2026)

EXPERIENCE

Department of Information and Communications Technology (DICT) Philippines
On-the-Job Trainee Feb 2026 – May 2026

- Facilitated the rollout of a DICT free internet connectivity program to partner schools, coordinating on-site deployment and orienting students and staff on the service.
- Assisted with networking tasks in field deployments and supported senior developers on website work.

PROJECTS

TeachWise – Teacher-Evaluation App (Android, Web) | *Laravel, React Native, MySQL, TypeScript* May 2025 – Oct 2026

- Built an anonymous teacher-evaluation app where students rate each class step by step in about three minutes, with offline-safe drafts; preparing for Google Play release.
- Designed five user roles: teachers view ratings, trends and anonymous comments in a printable report; administrators manage departments, classes, evaluation periods and questions in English and Filipino.
- Architected a multi-school system that scopes every record by school ID on every request, served by a REST API covered by 72 automated tests; one codebase runs on Android and the web.

Servease – Home-Services Marketplace | *PHP, MySQL, JavaScript* Jan 2025 – Oct 2026

- Developed a marketplace linking customers with ID-verified local service pros, with customer, pro and admin roles.
- Implemented booking, job posts, chat and reviews for customers, and quotes and earnings tracking for pros.
- Built an admin dashboard to verify pros and monitor users, bookings, payments and ratings.

BookTrack – Library Management System | *PHP, MySQL, JavaScript* Dec 2025 – Oct 2026

- Built the original system (LibraSys) solo in one month as a capstone, then rebuilt and expanded it.
- Implemented borrowing and due-date tracking for members, and book and circulation management for librarians.
- Designed the MySQL database and a librarian dashboard with loan statistics, overdue alerts and monthly charts.

Padala – Encrypted Project-Delivery App | *Node.js, JavaScript* Oct 2026 – Present

- Developing an installable app that encrypts project folders on the device (AES-256) before sending them to a team, and sends only changed files on updates.
- Implemented one-time team invite links that expire after 7 days and a built-in onboarding assistant, covered by 44 automated tests with zero external dependencies.

CERTIFICATIONS & ACTIVITIES

- **Google Cybersecurity Professional Certificate**, Coursera (Jul 2025)
- **SIEM Engineer Career Path**, LetsDefend (Jun 2025)
- **Cyber Threat Management**, Cisco Networking Academy (Jun 2025)
- Also completed: Cybersecurity Analyst Job Simulation; Information Security Specialist
- SOC analyst labs on TryHackMe (SOC Level 1), LetsDefend and SecurityBlue.team: Splunk log analysis, phishing and brute-force investigations
- Competed in Capture the King CTF (team cybersecurity competition); completed coding training on Walnut Education

SKILLS

Development: HTML5, CSS3, JavaScript, TypeScript, PHP, Laravel, Node.js, React Native, Expo, MySQL, REST APIs, jQuery, AJAX, Bootstrap, Tailwind CSS, Chart.js, GSAP, C++

Tools: Claude Code (AI-assisted development: planning, reviewing and testing AI-written code), Git, GitHub, VS Code, XAMPP, Postman, phpMyAdmin, Figma, Canva

Networking & Security: TCP/IP, subnetting, DHCP, DNS, VLANs, Cisco Packet Tracer, Wireshark, Nmap, Splunk, Kali Linux, Burp Suite, Metasploit, Snort, Active Directory, Linux, Windows

Languages: English, Tagalog
